Glitz & Glamour

LUXURIOUS NEW ARGENTO VANITY
FROM TOPEX DESIGN IS POSH YET PRACTICAL

(Elmwood Park, NJ – August 17, 2016) The stunning new Argento vanity from Topex Designs brings an incredible sense of glamour and luxury to the bathroom. The look is straight out of old Hollywood and calls to mind a certain nostalgia for beautiful starlets in opulent dressing rooms. The face of the vanity is comprised of eight elegant drawer fronts with scroll-inspired hardware. Matching scrollwork embellishes the front legs of the unit, which fits snugly against the wall for a clean look. With a European pedigree, the Argento offers a surprising volume of storage space without sacrificing good looks, making it an impeccable choice for bathrooms where form and function are paramount.

As part of Topex Design's AvantGarde Collection, the Argento pays tribute to classic designs that have been reinterpreted to align with today's contemporary aesthetics. Available in lengths up to 71", the Argento comes in four exquisite finishes – black glass, delmar silver glass, satin bronze mirror and white glass. Coordinating solid countertops are included with each cabinet, as is a choice of vessel sink in silver, black, burgundy, gold or white. Complete the look with an optional matching mirror or tall linen cabinet, measuring 57" x 14".

Presenting the contemporary classics of our century.

ABOUT TOPEX

Topex Design brings exceptional decorative hardware and bath products to the high-end luxury market with a style and flair that is exclusively European. Headquartered just outside of New York City, the company is a leading supplier of European manufactured luxury decorative hardware, accessories and bathroom furniture. Since 1974, the boutique bathroom furniture has been manufactured in Milan, Italy and Istanbul, Turkey under the brand name Antonio Valanti for discerning clientele worldwide. From decorative cabinet knobs adorned with Swarovski crystals to opulent bath vanities with mirrored finishes and lush leather the collections elevate the limits of bath design.
